Analytical report

AR-26-TH-013557-01-PTH04

**Sample Code**

296-2026-00013481

¹ Sample name	250906 005-10530-0005269848
Packaging	Plastic cup
Product	Honey
Sampler	Client
Number sample tubes	1
Type of seal	Without seal
Amount	approx. 80 g
Reception temperature	room temperature
Reception date time	10.08.2026
Start / End of analysis	10.08.2026 / 17.08.2026

Test results**Sensory analysis**

THH25	Sensory Analysis of Honey (#)
Method	ICS SOP 520-02 (2024-01)

sensory indication

Color: water-light
Consistency: liquid
Odor: animal urine-like, slightly source-specific
Taste: sweet, bloomy, mild, slightly source-specific

¹: This information was provided by the customer. Data provided by the customer may have an impact on the validity of the test results and the result assessment.

The analysis results and evaluation refer exclusively to the submitted samples and the scope of investigation. The measurement uncertainty does not include possible variation by sampling, if not stated otherwise.

The norm "General requirements for the competence of testing and calibration laboratories (DIN EN ISO/IEC 17025:2018, chapter 7.8.6) requires to state the decision rule for the consideration of the expanded measurement uncertainty in the conformity assessment analysis results obtained for the tested samples. Eurofins Food Integrity Control Services GmbH considers the expanded measurement uncertainty in case the analysis results exceed a legal limit or specification value. In case the analysis results do not exceed a legal limit or specification value, the expanded measurement uncertainty is not considered. Please contact us, if you have particular requirements differing from this standard procedure in order to set up an individual procedure according to your specific needs.

Microscopy**THH21 Pollen Analysis - Bot. & Geogr. Origin (ADV) (#)**

Method DIN 10760 mod. (2002-05) [ICS SOP 520-11 (2024-01)]

Modification: Sample amount

Microscopic examination of pollen**Number of pollen counted:** 500**Number of types of pollen identified:** 28**Other components of sediment:** elements of fungus, spores, crystals, plant tissue, vegetable fibers, black particles, brown sediment, slightly typical for honey**Yeast content / 10 g honey:** 500.000 - 1.000.000 (high)**Starch content:** < 5/500* Pollen**Amount of honeydew particles:** some**Pollen from nectarless plants:** 40**Very frequent pollen > 46 %**

none

Frequent pollen 16 - 45 %

45% Fabaceae/Robinia pseudoacacia/Robinie/Robinia

Single pollen 3 - 15%

10% Rutaceae/Tetradium daniellii/Samthaarige Stinkesche/Samthaarige Stinkesche

8% Rosaceae/diff. Genera/Rosengewächse/Rose

6% Celastraceae/Celastrales/Spindelbaumgewächse/Bittersweet Family

5% unknown pollen (small tricolporate)

4% Brassicaceae/diff. genera/Kreuzblütler/Crucifers

Isolated pollen < 3 %

2% Fabaceae/Astragalus spec./Berglinse/Milk Vetch

Actinidiaceae/Actinidia spec./Kiwi/Kiwi°

Amaryllidaceae/Allium spec./Lauch/Onion

Anacardiaceae/diff. Genera./Sumachgewächse/Cashew Family

Asteraceae/Carduus spec./Ringdistel/Plumeless Thistle

Asteraceae/Taraxacum/Löwenzahn/Dandelion

Caprifoliaceae/Lonicera spec./Geißblatt/Honeysuckle

Convolvulaceae/diff. genera./Windengewächse/Bindweed

Ericaceae/Erica/Heidekräuter/Heather

Euphorbiaceae/macaranga spec.

Fabaceae/Amorpha fruticosa/Bastardindigo/False Indigo

Fabaceae/Gleditsia spec./Gleditschie/Honeylocust

Fabaceae/Vicia spec./Bohne/Bean

Fagaceae/Castanea-Type

Oleaceae/Ligustrum/Liguster/Privet

Paulowniaceae/Paulownia/Blauglockenbaum/Foxglove Tree

Phyllanthaceae/Flueggea/Buschkraut/Bushweed

Polygonaceae/Rumex spec./Ampfer/Sorrel°

Rhamnaceae/diff. genera/Kreuzdorngewächse/Buckthorn Family

Physico-chemical analysis

THH05 Electrical conductivity (20 °C) (#)
Method ICS SOP 510-06 (2021-04)

	Result	Uncertainty	Unit
Conductivity at 20°C	0.14	(± 0.01)	mS/cm

(#) = Eurofins Food Integrity Control Services is accredited for this test.

Assessment

According to the pollen-analysis, organoleptic properties and corresponding physical-chemical parameters (electrical conductivity) the above-mentioned sample may be called "Acacia Honey", if the F/G ratio corresponds (Honey directive 2001/110/EU, Article 2 from June 14th, 2026, in connection with Annex I and relevant literature: BMEL (2022). Neufassung der Leitsätze des Deutschen Lebensmittelbuchs für Honig. GMBI 2022, S. 429-430). Otherwise, it may be called "Blossom Honey with Acacia Honey".

Based on the current scientific knowledge, the analyzed pollen spectrum indicates "China" as regional origin (Honey Directive 2001/110/EC; Article 2 in connection with Annex I and relevant literature).

The analyzed yeast content is increased and can give a hint towards a fermentation or a stopped fermentation. However, the organoleptic properties do not provide an additional hint towards such fermentation. So, the sample corresponds to the legal regulations (Honey directive 2001/110/EU, Article 1 in connection with Annex II).
