Analytical report

AR-26-TH-013558-01-PTH04

**Sample Code**

296-2026-00013482

¹ Sample name	4/02/2029 005-10530-0005269849
Packaging	Plastic cup
Product	Honey
Sampler	Client
Number sample tubes	1
Type of seal	Without seal
Amount	approx. 90 g
Reception temperature	room temperature
Reception date time	10.08.2026
Start / End of analysis	10.08.2026 / 17.08.2026

Test results**Sensory analysis**

THH25	Sensory Analysis of Honey (#)
Method	ICS SOP 520-02 (2024-01)

sensory indication**Color:** very light**Consistency:** partly crystalline, two layers, with rough crystals**Odor:** slightly source-specific**Taste:** sweet, bloomy, herbal, slightly source-specific

¹: This information was provided by the customer. Data provided by the customer may have an impact on the validity of the test results and the result assessment.

The analysis results and evaluation refer exclusively to the submitted samples and the scope of investigation. The measurement uncertainty does not include possible variation by sampling, if not stated otherwise.

The norm "General requirements for the competence of testing and calibration laboratories (DIN EN ISO/IEC 17025:2018, chapter 7.8.6) requires to state the decision rule for the consideration of the expanded measurement uncertainty in the conformity assessment analysis results obtained for the tested samples. Eurofins Food Integrity Control Services GmbH considers the expanded measurement uncertainty in case the analysis results exceed a legal limit or specification value. In case the analysis results do not exceed a legal limit or specification value, the expanded measurement uncertainty is not considered. Please contact us, if you have particular requirements differing from this standard procedure in order to set up an individual procedure according to your specific needs.

Microscopy

THH21 Pollen Analysis - Bot. & Geogr. Origin (ADV) (#)

Method DIN 10760 mod. (2002-05) [ICS SOP 520-11 (2024-01)]

Modification: Sample amount

Microscopic examination of pollen

Number of pollen counted: 500

Number of types of pollen identified: 25

Other components of sediment: elements of fungus, spores, crystals, plant tissue, vegetable fibers, black particles

Yeast content / 10 g honey: 500.000 - 1.000.000 (high)

Starch content: < 5/500* Pollen

Amount of honeydew particles: low

Pollen from nectarless plants: 8

Very frequent pollen > 46 %

92% Brassicaceae/Brassica napus/Raps/Rape

Frequent pollen 16 - 45 %

none

Single pollen 3 - 15%

none

Isolated pollen < 3 %

2% Rosaceae/Pyrus/Prunus-T/Obst

2% Salicaceae/Salix/Weide/ Willow

1% Sapindaceae/Acer spec./Ahorn/Maple

Amaranthaceae/Chenopodiaceae/Gänsefuß/Goosefoot°

Apiaceae/diff.genera/Doldenblütler/Parsley Family

Asteraceae/Achillea spec./Anthemis Schafgarbe/Yarrow/Chamomile

Asteraceae/Aster-Type

Asteraceae/Helianthus spec./Sonnenblume/Sunflower

Asteraceae/Taraxacum/Löwenzahn/Dandelion

Balsaminaceae/Impatiens spec./Springkraut/Balsam

Boraginaceae/Phacelia spec./Bienenweide/Phacelia

Fabaceae/Astragalus spec./Berglinse/Milk Vetch

Fabaceae/Robinia pseudoacacia/Robinie/Robinia

Fabaceae/Trifolium pratense spec./Rotklee/Red Clover

Fabaceae/Trifolium/Klee/Clover

Malvaceae/Tilia spec./Linde/Linden

Orobanchaceae/Rhinanthus spec./Klappertöpfe/rattles

Papaveraceae/Papaver spec./Mohn/Poppy°

Pinaceae/Pinus/Pinie/Pine°

Poaceae/diff.genera/Süßgräser/Graminea°

Poaceae/Zea mays/Mais/Sweetcorn°

Polygonaceae/Fagopyrum spec./Buchweizen/Buckwheat

Polygonaceae/Rumex spec./Ampfer/Sorrel°

Physico-chemical analysis

THH05 Electrical conductivity (20 °C) (#)
Method ICS SOP 510-06 (2021-04)

Conductivity at 20°C

Result	Uncertainty	Unit
0.25	(± 0.02)	mS/cm

(#) = Eurofins Food Integrity Control Services is accredited for this test.

Assessment

According to the pollen-analysis, organoleptic properties and corresponding physical-chemical parameters (electrical conductivity) the above-mentioned sample may be called "Rape Honey", if the F/G ratio corresponds (Honey directive 2001/110/EU, Article 2 from June 14th, 2026, in connection with Annex I and relevant literature: BMEL (2022). Neufassung der Leitsätze des Deutschen Lebensmittelbuchs für Honig. GMBI 2022, S 429-430). Otherwise, it may be called "Blossom Honey with Rape Honey".

Based on the current scientific knowledge, the analyzed pollen spectrum indicates "Central Europe" as regional origin (Honey Directive 2001/110/EC; Article 2 in connection with Annex I and relevant literature).

The analyzed yeast content is increased and can give a hint towards a fermentation or a stopped fermentation. However, the organoleptic properties do not provide an additional hint towards such fermentation. So, the sample corresponds to the legal regulations (Honey directive 2001/110/EU, Article 1 in connection with Annex II).
