Analytical report

AR-26-TH-013559-01-PTH04

**Sample Code**

296-2026-00013483

¹ Sample nameCQ25111501-1
005-10530-0005269850**Packaging**

Plastic cup

Product

Honey

Sampler

Client

Number sample tubes

1

Type of seal

Without seal

Amount

approx. 90 g

Reception temperature

room temperature

Reception date time

10.08.2026

Start / End of analysis

10.08.2026 / 17.08.2026

Test results**Sensory analysis****THH25 Sensory Analysis of Honey (#)**
Method ICS SOP 520-02 (2024-01)**sensory indication****Color:** very light**Consistency:** liquid**Odor:** slightly source-specific**Taste:** sweet, bloomy, medical, slightly bitter, minty, slightly source-specific

¹: This information was provided by the customer. Data provided by the customer may have an impact on the validity of the test results and the result assessment.

The analysis results and evaluation refer exclusively to the submitted samples and the scope of investigation. The measurement uncertainty does not include possible variation by sampling, if not stated otherwise.

The norm "General requirements for the competence of testing and calibration laboratories (DIN EN ISO/IEC 17025:2018, chapter 7.8.6) requires to state the decision rule for the consideration of the expanded measurement uncertainty in the conformity assessment analysis results obtained for the tested samples. Eurofins Food Integrity Control Services GmbH considers the expanded measurement uncertainty in case the analysis results exceed a legal limit or specification value. In case the analysis results do not exceed a legal limit or specification value, the expanded measurement uncertainty is not considered. Please contact us, if you have particular requirements differing from this standard procedure in order to set up an individual procedure according to your specific needs.

Microscopy**THH21 Pollen Analysis - Bot. & Geogr. Origin (ADV) (#)**

Method DIN 10760 mod. (2002-05) [ICS SOP 520-11 (2024-01)]

Modification: Sample amount

Microscopic examination of pollen**Number of pollen counted:** 500**Number of types of pollen identified:** 20**Other components of sediment:** elements of fungus, spores, crystals, plant tissue, vegetable fibers, black particles, oxalate crystals**Yeast content / 10 g honey:** >1.000.000 (extremely high)**Starch content:** < 5/500* Pollen**Amount of honeydew particles:** low**Pollen from nectarless plants:** 197**Very frequent pollen > 46 %**

none

Frequent pollen 16 - 45 %

44% Malvaceae/Tilia spec./Linde/Linden

Single pollen 3 - 15%

13% Rosaceae/diff. Genera/Rosengewächse/Rose

8% unknown pollen (small tricolporate)

6% Brassicaceae/diff. genera/Kreuzblütler/Crucifers

5% Fabaceae/Robinia pseudoacacia/Robinie/Robinia

Isolated pollen < 3 %

2% Fabaceae/Vicia spec./Bohne/Bean

1% Asteraceae/Aster-Type

Actinidiaceae/Actinidia spec./Kiwi/Kiwi°

Apiaceae/Coriandrum/Koriander/Coriander

Asteraceae/Taraxacum/Löwenzahn/Dandelion

Caprifoliaceae/Lonicera spec./Geißblatt/Honeysuckle

Celastraceae/Celastrales/Spindelbaumgewächse/Bittersweet Family

Fabaceae/Amorpha fruticosa/Bastardindigo/False Indigo

Fabaceae/Genista/Ginster/Greenweed

Fabaceae/Trifolium/Klee/Clover

Fagaceae/Quercus spec./Eiche/Oak°

Juglandaceae/Juglans spec./Walnuss/Walnut°

Phyllanthaceae/Flueggea/Buschkraut/Bushweed

Rosaceae/Potentilla spec./Fingerkraut/Cinquefoil°

Simaroubaceae/Ailanthus/Götterbaum/Tree of heaven

°nectarless plants

Physico-chemical analysis

THH05 Electrical conductivity (20 °C) (#)

Method ICS SOP 510-06 (2021-04)

Conductivity at 20°C

Result	Uncertainty	Unit
0.33	(± 0.02)	mS/cm

(#) = Eurofins Food Integrity Control Services is accredited for this test.

Assessment

According to the pollen-analysis, organoleptic properties and corresponding physical-chemical parameters (electrical conductivity) the above-mentioned sample may be called "Linden Honey", if the F/G ratio corresponds (Honey directive 2001/110/EU, Article 2 from June 14th, 2026, in connection with Annex I and relevant literature: BMEL (2022). Neufassung der Leitsätze des Deutschen Lebensmittelbuchs für Honig. GMBI 2022, S. 429-430). Otherwise, it may be called "Blossom Honey with Linden Honey".

Based on the current scientific knowledge, the analyzed pollen spectrum indicates "China" as regional origin (Honey Directive 2001/110/EC; Article 2 in connection with Annex I and relevant literature).

The analyzed yeast content is extremely increased and can give a hint towards fermentation or a stopped fermentation. However, the organoleptic properties do not provide an additional hint towards such fermentation. So, the sample corresponds to the legal regulations (Honey directive 2001/110/EU, Article 1 in connection with Annex II).
