n.d.= not detected, n.d.(Starch)=<1%, n.a.=not analysed  
see attachment for results of the pollen analysis  
Assessment according to Directive 2001/110/EC in combination with literature

(a) : accredited method. (na) : not accredited method. (1) DIN 10760 (2) Inhouse procedure (3) DIN 10964  
This document may only be reproduced in full. The results given herein apply to the submitted sample only.

### Interpretation:

Based on the analysed organoleptic, physico-chemical and microscopic characteristics, the above stated botanical and geographical origin was determined for this sample.

The sample contains mostly pollen from nectarless plants, hence, the number of nectariferous plants is so low that the values may not be representative. The yeast content can give a hint towards a fermentation or a stopped fermentation.

Dr. Klaus Beckmann  
Responsible Scientist, Certified Food Chemist

## Relative distribution of pollen of nectariferous plants after DIN10760: 2002-5

(undiff. = undifferentiated; accomp. = accompanying; signif. = significant)

|                                    |     |                                       |
|------------------------------------|-----|---------------------------------------|
| Main pollen (>45%)                 | 48% | Tilia (linden)                        |
| Signif. Isolated pollen (3% - 15%) | 5%  | undiff. Brassicaceae (cabbage family) |

## List of identified pollen types

### Identified pollen grains of nectariferous plants

|                |                              |
|----------------|------------------------------|
| Alismataceae   | undiff. (water-plantains)    |
| Alliaceae      | undiff. (-)                  |
| Apiaceae       | Coriandrum (coriander)       |
| Apiaceae       | undiff. (carrot family)      |
| Asteraceae     | Serratula (saw-worth)        |
| Asteraceae     | Taraxacum (dandelion)        |
| Asteraceae     | undiff. (daisy family)       |
| Balsaminaceae  | Impatiens (balsam)           |
| Brassicaceae   | undiff. (cabbage family)     |
| Caprifoliaceae | undiff. (honeysuckle family) |
| Fabaceae       | Astragalus (milk vetch)      |
| Fabaceae       | Glycine (soya bean)          |
| Fabaceae       | Robinia (false acacia)       |
| Fabaceae       | Trifolium (clover)           |
| Fabaceae       | Vicia (vetch)                |
| Fagaceae       | Castanea (chestnut)          |
| Lamiaceae      | undiff. (mint family)        |
| Phyllanthaceae | Flueggea (-)                 |
| Polygonaceae   | Polygonum (knotgrass)        |
| Rhamnaceae     | undiff. (buckthorn family)   |
| Rosaceae       | Prunus (stone fruit)         |
| Rosaceae       | Pyrus (pear)                 |
| Rutaceae       | Citrus (citrus fruit)        |
| Tiliaceae      | Tilia (linden)               |
| Vitaceae       | Vitis (vine)                 |

### Identified pollen grains of nectarless plants

|                |                                        |
|----------------|----------------------------------------|
