

Test Report No. 210-1757063

QSI GmbH - Flughafendamm 9a - D-28199 Bremen

Huzar Sp. z o.o.
 Marek Sitko
 Tarnowska Street 161
 33-330 Nowy Sacz
 POLAND

Date: 12-Aug-2026

Customer No.:	10550	Sample No.:	685659
Product:	Honig/Honey		
Label:	ODER 23/2026, 21/05		
Arrival Date:	10-Aug-2026	Start / End of Analysis:	10-Aug-2026 / 12-Aug-2026
Kind/Origin:		Packaging:	Kunststoff / plastic
Seal:	ohne/without	Temp.:	RT

VA220 (2025-08) Botanical and geographical Origin, compliance with EC-Honey Directive

Parameter (Method)	Unit	Result
Electr.conductivity(ASU L 40.00-5, 2021-11, mod^)	mS/cm	0,07
rel.frequency of pollen(ASU L 40.00-11, 2003-12, mod.^)		
Predominant pollen 1	%	keine/none
Predominant pollen 2	%	keine/none
Secondary pollen 1	%	26 Artemisia (Beifuß, Mugwort) -Type (P)
Secondary pollen 2	%	26 Brassicaceae (Kreuzblütler, Crucifers)
Secondary pollen 3	%	keine/none
Minor pollen 1	%	12 Actinidia chinensis-(Kiwifruit-)Type (P)
Minor pollen 2	%	08 Camellia (Tee)
Minor pollen 3	%	03 Apiaceae (Doldenblütler, Umbellifers)
Identified pollentypes		Brassica napus (Raps, Rape) Trifolium/Melilotus (Kleearten, Clover-Types) Trifolium repens (Weißklee, White Clover) Helianthus annuus (Sonnenblume, Sunflower) Eucalyptus spec. Chenopodium (Gänsefuß, Black Weed) -Type (P) Fagopyrum (Buchweizen, Buckwheat) Plantaginaceae (Wegerichgewächse, Plantain) (P) Pirus/Prunus (Obst, Fruit Blossom) Salix sp. (Weiden, Willow) Rosaceae (Rosen, Rose Family) Juglandaceae (Walnußgewächse, Walnut Family) (P) unidentified pollen-types

HD-Elements, fungal spores *	wenige/few
HD-Elements, waxwool *	keine/none
HD-Elements, waxstrings *	keine/none
Yeastcontent, estimation (VA 262)	mittel/medium
Starchgrains ** (VA 268)	gering/low ($\leq 10\%$)
Other solid constituents	schwach honigtypisch/weakly honey-specific, einige Partikel wie Futtermittelreste/some particles like feeding-stuff, vermehrt Pflanzenteile/many parts of plants
Conclusion: Type of honey, HoneyDir., Art.1, Annex I	-
Conclusion: Botanical origin, HoneyDirective., Art 2	-
Conclusion: Geographical origin	China
Odour (ASU L 00.90-6, 2015-06, mod.^^)	nicht honigtypisch/not honey-specific
Flavour (ASU L 00.90-6, 2015-06, mod.^^)	nicht honigtypisch/not honey-specific
Colour (ASU L 00.90-6, 2015-06, mod.^^)	honigtypisch/honey-specific
Consistency (ASU L 00.90-6, 2015-06, mod.^^)	kristallin/crystallized

Accredited method

u.r. = underrepresented; ü.r. = overrepresented; k = counted without pollen from nectarless plants (P)

*HD = Honeydew; **Starchgrains in % per 300 pollen- and starchgrains counted

^Weighing, ^^Adjustment in volume and temperature, ^^Matrix: only Honey

The expanded relative measurement uncertainty is 5 % (electr. conductivity) without taking the sampling into account.

Conclusion:

A declaration of the geographical origin China is consistent with the above determined pollen spectrum given current scientific research.

The low electrical conductivity does not correspond to the pollen spectrum. The authenticity of the honey should be verified by further methods (e.g. NMR).

 Julia Kapeluch
 Test Manager
 Food Chemist

This examination is the basis for special decision guidance.

The test results are exclusively related to the items tested for this sample in the above mentioned time frame for analysis. Method details are available upon request. Unless otherwise stated, the reported measurement uncertainty is given with an expansion factor $k=2,58$, corresponding to a confidence level of 99%. This report is allowed to be copied completely and unchanged but not in extracts. Furthermore, as well as for statements regarding conformity our General Terms and Conditions of Business are applicable.
