

Test Report No. 210-1757062

QSI GmbH - Flughafendamm 9a - D-28199 Bremen

Huzar Sp. z o.o.
Marek Sitko
Tarnowska Street 161
33-330 Nowy Sacz
POLAND

Date: 14-Aug-2026

Customer No.:	10550	Sample No.:	685658
Product:	Honig/Honey		
Label:	ODER 23/2026, 25C062101		
Arrival Date:	10-Aug-2026	Start / End of Analysis:	10-Aug-2026 / 12-Aug-2026
Kind/Origin:		Packaging:	Kunststoff / plastic
Seal:	ohne/without	Temp.:	RT

VA220 (2025-08) Botanical and geographical Origin, compliance with EC-Honey Directive

Parameter (Method)	Unit	Result
Electr.conductivity(ASU L 40.00-5, 2021-11, mod [^])	mS/cm	0,12
rel.frequency of pollen(ASU L 40.00-11, 2003-12, mod. ^{^^})		
Predominant pollen 1	%	keine/none
Predominant pollen 2	%	keine/none
Secondary pollen 1	%	43 Robinia pseudoacacia (Falsche Akazie, False Acacia) u.r.
Secondary pollen 2	%	25 Brassicaceae (Kreuzblütler, Crucifers)
Secondary pollen 3	%	keine/none
Minor pollen 1	%	07 Euonymus (Pfaffenhütchen, Spindle)-Type
Minor pollen 2	%	04 overrepresented small pollen - types
Minor pollen 3	%	02 Vicia (Wicken, Vetch) -Type
Identified pollentypes		Brassica napus (Raps, Rape) Malvaceae (Malvengewächse) Rhamnaceae (Kreuzdorngewächse, Buckthorn-Family) Astragalus (Tragant, Milk vetch) -Type ü.r. unidentified pollen-types Vitex-Type Rosaceae (Rosen, Rose Family)
HD-Elements, fungal spores *		wenige/few
HD-Elements, waxwool *		keine/none
HD-Elements, waxstrings *		keine/none
Yeastcontent, estimation (VA 262)		erhöht/increased
Starchgrains ** (VA 268)		gering/low (=<10%)

Test Report No.: 210-1757062 Version 0

Page: 1 of 2

Other solid constituents	schwach honigtypisch/weakly honey-specific, vermehrt Partikel wie Futterteigreste/many particles like feeding-stuff, einige schwarze und braune Partikel/some black and brown particles
Conclusion: Type of honey, HoneyDir., Art.1, Annex I	-
Conclusion: Botanical origin, HoneyDirective., Art 2	-
Conclusion: Geographical origin	China
Odour (ASU L 00.90-6, 2015-06, mod. ^{^^})	nicht honigtypisch/not honey-specific
Flavour (ASU L 00.90-6, 2015-06, mod. ^{^^})	nicht honigtypisch/not honey-specific
Colour (ASU L 00.90-6, 2015-06, mod. ^{^^})	trachttypisch/source-specific
Consistency (ASU L 00.90-6, 2015-06, mod. ^{^^})	flüssig/liquid

Accredited method

u.r. = underrepresented; ü.r. = overrepresented; k = counted without pollen from nectarless plants (P)

*HD = Honeydew; **Starchgrains in % per 300 pollen- and starchgrains counted

[^]Weighing, ^{^^}Adjustment in volume and temperature, ^{^^^}Matrix: only Honey

***According to the Directive 2001/110/EC, as of 14 June 2026, also honey, which have been obtained by removing foreign inorganic or organic matter in such a way as to result in the significant removal of pollen (filtered) is classified as baker's honey

The expanded relative measurement uncertainty is 5 % (electr. conductivity) (coverage factor k=2.58; confidence interval 99 %) without taking the sampling into account.

Conclusion:

A declaration of the geographical origin China is consistent with the above determined pollen spectrum given current scientific research.

Odour and taste are not in accordance with the pollen spectrum. Some more tests should be done.
